

# UI Testing Report

## User Story:

As an Employer, I want to input my employee data so that I can get a preview of benefit costs.

## Assumptions:

- All employees are paid \$2000 per paycheck before deductions
- There are 26 paychecks in a year
- The cost of benefits is \$1000/year for each employee
- Each dependent incurs a cost of \$500/year

## Acceptance Criteria

### Scenario 1: Add Employee

GIVEN an Employer

AND I am on the Benefits Dashboard page

WHEN I select Add Employee

THEN I should be able to enter employee details

AND the employee should save

AND I should see the employee in the table

AND the benefit cost calculations are correct

### Positive Testcases

1. On Benefits Dashboard Page
2. click on Add Employee

[Add Employee](#)

6. In the dashboard, if I click on the text *Paylocity Benefits Dashboard*, the table elements disappear. In the dashboard, if I click on the text Paylocity Benefits Dashboard, the table elements disappear.

7. The label “Log Out” disappears.

7. When you click on the text Paylocity Benefits Dashboard, you can see the user interface, which I consider incorrect for security reasons.

8. You can click the Add Employee button, and it displays the form as if you were a privileged user.

9. After a while the session gets broken and you can't Add, edit or delete anything on the Dashboard

10. If you enter text in the Dependents field, it doesn't notify you that it's not allowed or explain what's wrong, which is not user-friendly.

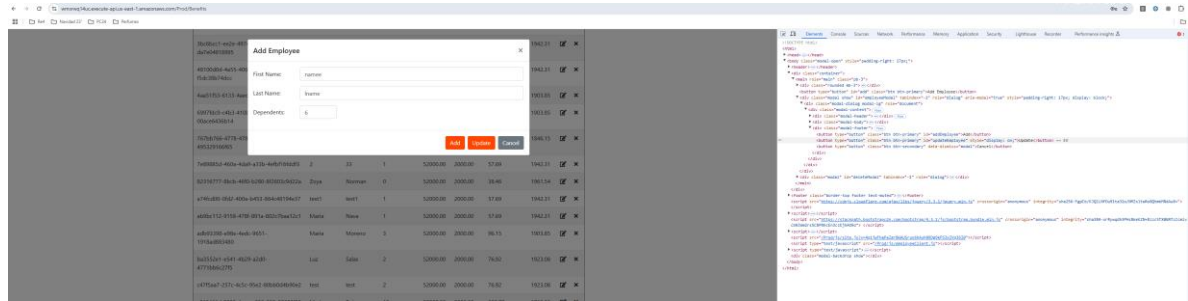

Add Employee ×

First Name:

Last Name:

Dependents:

11. In the "Add Employee" form, the "Update" button should be hidden, but it appears even when the form is not meant for editing. This button can be edited to be hidden within the form.

12. Regarding the error with the order of elements in the "Dashboard" table, it is not part of the form. Upon checking with developer tools - Network, we can confirm that the request body is sent as "firstName" and "lastName." The issue likely lies in the table headers.
